Enjoy healthy, great tasting water straight from the tap. Our products are designed for a variety of homes and requirements.

**3M Water Filters can reduce the following from your water supply\*\*:**

**Sediment:** Can damage plumbing and appliances over time. It includes rust particles that can cause brown, yellow or orange spots on clothing, fixtures and toilets.

**Taste/Odour:** Chlorine is used by water treatment plants to kill harmful bacteria and organisms. Chlorine has a recognizable taste and odour that can be unpleasant.

**Cysts:** Encapsulated forms of certain single cell parasites like oocysts of Cryptosporidium that may be present in drinking water and resistant to normal chlorination.

**Hardness/Scale:** Scale can cause water to fail to generate a lather with soap, and can build-up on and create the failure of heating elements, piping, valves, solenoids etc. and is caused by the presence of calcium and magnesium ions.

**Lead:** Water is naturally a solvent and can leach lead and other heavy metals from brass taps and plumbing fittings. Lead may be present in pipes and the older used to connect pipes.

**Chemicals/VOCs:** Contaminants resulting from pesticide runoff and gasoline leakage into ground water. (VOCs — Volatile Organic Chemicals).
